**Short title and commencement** 25

**31.** This Act is called the National Radioactive Waste Management Agency Act, 2008, and comes into operation on a date specified by the President by proclamation in the *Gazette*.

## **MEMORANDUM ON THE OBJECTS OF THE NATIONAL RADIOACTIVE WASTE MANAGEMENT AGENCY BILL, 2008**

### **1. OBJECTS OF BILL**

The purpose of the National Radioactive Waste Management Agency Bill is to provide for the establishment of a National Radioactive Waste Management Agency. This Agency will manage radioactive waste on a national basis. This is in line with international developments, where many countries have independent agencies handling radioactive waste management and research into high-level waste management.

Dealing with used fuel and radioactive waste is a long-term issue which requires focused attention of a dedicated organisation. The establishment of the Agency will leave the operators/generators to focus on their core business, be it medical isotope production, nuclear research and development or electricity generation. The generators will, however, remain financially responsible for the disposal of the waste.

The Agency, once formed, will be the only organisation to handle radioactive waste disposal and onsite-predisposal management and storage. This Agency will also be responsible for managing ownerless radioactive waste on behalf of the State.

It is international best practice to separate activities related to the generation and disposal of radioactive waste. This provides the necessary assurance, checks and balances so that radioactive waste is being dealt with in a consistent manner in the country and that there is no danger of generators cutting spending for the management of radioactive waste when companies have financial difficulties.

### **2. FINANCIAL IMPLICATIONS**

Expenses for the establishment and initial operation of the Agency will be defrayed from money appropriated by Parliament to the Department until such time as the Radioactive Waste Management Fund has been established by an Act of Parliament. A business plan with the set-up costs will be submitted via the normal budgeting process once the Bill has been enacted.

Once the Fund has been established, generators of radioactive waste will pay the Agency for operational expenses and also contribute to the Radioactive Waste Management Fund (once established) as determined by the "polluter pays principle" for long-term management issues.

### **3. CONSULTATION PROCESS**

There are ongoing interactions between the Department of Minerals and Energy and the Department of Environmental Affairs and Tourism.

### **4. PARLIAMENTARY PROCEDURE**

4.1 The State Law Advisers and the Department of Minerals and Energy are of the opinion that this Bill must be dealt with in accordance with the procedure established by section 75 of the Constitution since it contains no provision to which the procedure set out in section 74 or 76 of the Constitution applies.

4.2 The State Law Advisers are of the opinion that it is not necessary to refer this Bill to the National House of Traditional Leaders in terms of section 18(1)(a) of the Traditional Leadership and Governance Framework Act, 2003 (Act No. 41 of 2003), since it does not contain provisions pertaining to customary law or customs of traditional communities.
